The gross rate is the contractual rate of interest payable before any deduction of income tax. Tax treatment or the rate of interest payable may be subject to change in the future and the tax treatment depends on your individual circumstances. AER stands for the Annual Equivalent Rate and is a notional rate that illustrates what the contractual interest rate would be if interest was paid and compounded on an annual basis. Interest is credited monthly. Interest rates are variable unless otherwise stated but correct at time of going to print.
